

Kaipara Moana Remediation – Provisional Plant Prices 2021-2022

The following table provides the Schedule of Prices for the set price arrangement that the KMR programme intends to adopt. A set price range has been adopted for each species. In line with the KMRs joint funding arrangement, the KMR will contribute **up to 50%** of this cost, with the remainder being provided by the recipient of the plants. Please note that these prices are for the plant only, and do not include contract oversight, set out, site preparation and transportation. These prices are provided to inform nurseries who are seeking to become KMR Accredited and are subject to change, including but not limited to a price review occurring after two years to keep up with changing market conditions.
