KMR protects and restores the Kaipara Moana

An estimated 700,000 tonnes of sediment flow into the Moana each year – seven times the natural rate.

Sediment smothers riverbeds and the seabed and reduces light in waterways, with significant effects on fish, shellfish and plant life.

It also reduces the recreational, cultural, environmental and economic values of the Kaipara Moana that are important to communities across the catchment.

KMR supports people, places and nature

KMR invests in projects to restore wetlands, fence off rivers and streams, plant trees and regenerate forest on erosion-prone land. These important actions create many benefits. They:

- Help valued species to thrive
- Restore mahinga kai
- Diversify on-farm income
- Help meet environmental standards
- Increase resilience to storms and other extreme weather

Kaipara Moana Catchment

The Kaipara Moana catchment spans 600,000 hectares across both Northland and Auckland.

KMR is delivering strong results

Just over two and a half years into operational delivery, KMR has supported over 800 landowners and groups to develop project plans and take action on the ground.

Jobs and Skills

- **350,000** hours of new work – a year's work for over **225** people
- **$20 million** invested in restoration projects
- **47** local businesses and nurseries accredited to supply KMR
- **184** people trained and mentored, many from local iwi/hapū

Engagement and Participation

- **1,131** landowners/groups have expressed interest in KMR
- **750** plans completed with landowners/groups
- **92** plans in development
- **74** projects led by hapū, marae, community groups, catchment groups and other collectives.

Nature

- **2.02 million** plants in the ground or contracted to plant
- **892** hectares planted or contracted, or regenerating into native forest
- **885** km of fencing completed or contracted – **the distance from Cape Rēinga to Auckland and back**
- **130,000** hectares managed under KMR plans

Come and join us!

Join the many landowners and groups across the catchment who are already working with KMR.

Contact our team if:

- Your land is in the catchment
- You have a sediment reduction project in mind
- You'd like to know more about how KMR can support you

We offer:

- **Free advice** - we walk the land with you to discuss your aspirations and project options
- **Funding** – KMR typically pays up to 50% of the cost of eligible sediment reduction projects
- Support with **group engagement and project management** costs if you are a community group, marae, iwi/hapū or other collective
- **Planning and support** – our Field Advisors prepare a plan to access KMR funding and provide support through the project
